ESTATE AGENTS

We are Agents for

MALAYALAM PLANTATIONS, LTD.
THE ANAMALLAY TEA ESTATES, LTD.
CLOUDLAND TEA ESTATE CO., LTD.
THE KERALA TEA CO., LTD.
THE NONSUCH TEA ESTATES, LTD.
THE VAIKUNDAM CO., LTD.
CORRIMONY ESTATE.
PAALALI ESTATE.

which comprise a cultivated area of over 45,000 acres.

We have offices staffed with experts in London and in all the main Tea and Rubber producing countries in the world and are therefore exceptionally favourably situated for advising clients on any point in connection with the production and marketing of these commodities.

We undertake

The agency of Tea, Rubber, and Produce Estates and Companies.

The shipment of Tea and Rubber to London, Colombo, or any part of the world.

The sale of Tea and Rubber in India or elsewhere.

We are in touch with the largest buyers of Rubber in India, and with the leading local and Bombay buyers of Tea.

*** Arrive RANGOON 5 days later.**

The probable 1937 outward sailing dates for Cochin will be :—

Leave Liverpool 15th Jan., 12th Feb., 12th March, 9th April, 7th May, 4th June arrive Cochin 7th Feb., 7th March, 4th April, 2nd May, 30th May, 27th June.

Leave Liverpool 2nd July, 30th July, 27th Aug., 10th Sept. 24th Sept. arrive Cochin 25th July, 22nd Aug., 19th Sept. 3rd Oct., 17th Oct,

Leave Liverpool 8th Oct., 22nd Oct., 5th Nov., 19th Nov., 17th Dec., arrive Cochin 31st Oct., 14th Nov., 28th Nov., 12th Dec., 9th Jan. '38.

Passengers returning to Cochin in September, October and November, 1937, are recommended to reserve outward accommodation at the time of booking their homeward passage. Passengers returning in these months in 1936 should make immediate application if they have not yet reserved outward accommodation.

BIBBY LINE

Notes for Cochin Passengers

Through broad gauge carriages now run daily between Mangalore, Mettupalaiyam, Bangalore, Madras, Trichinopoly and Ernakulam, special through carriages with additional first class accommodation being provided, when required, to connect with the Bibby Line homeward and outward sailings from Cochin. Friends and relatives of passengers travelling by rail to Cochin are particularly requested to notify us, to ensure the provision of sufficient first class accommodation to and from Ernakulam.

The special through carriages for Bibby passengers run to and from Ernakulam new passenger jetty. Motor Launches convey passengers and their luggage free of charge from Ernakulam new passenger jetty to the Malabar Hotel, or to Cochin, thence to the Bibby Liners.

Motor Launches convey road passengers and their luggage free of charge from Coombes' jetty, Ernakulam, to the Malabar Hotel, or to Cochin, thence to the Bibby Liners.

Excellent accommodation for passengers is available at the Malabar Hotel, Willingdon Island, facing the entrance to Cochin Harbour and the berth where the Bibby Liners are moored.

Our representative is in attendance at the Malabar Hotel on Bibby sailing days, and Cook's Travellers' Cheques may be obtained from him.

Special Short Trips

COCHIN—RANGOON		COCHIN—COLOMBO	
To Rangoon Return by first Sailing ...	**Rs. 200**	Single ...	**Rs. 45**
Return in 2 months ...	**Rs. 250**	Return ...	**Rs. 75**

The above rates do not include Railway fares to and from ports, but they include free conveyance between Ernakulam and the Bibby Liners.

For Marseilles and London fares, and Sailing lists, see pages iii, iv and v.

ASBESTOS-CEMENT

ASBESTOS-CEMENT is a combination of cement, the ideal building material, with asbestos, the ideal and imperishable binding agent. The asbestos fibre gives to the cement that toughness and resiliency which enables it to be used in the form of thin, light sheets, which can be cut and sawn, and yet are durable and permanent under all conditions of weather.

"EVEREST" Asbestos-Cement materials give excellent insulation against heat. For this reason they are increasingly demanded for industrial buildings, especially in India, no whitewashing being necessary, as with an ordinary tile roof. "EVEREST" Asbestos-Cement, under normal conditions, requires neither bituminous paint nor any other treatment. "EVEREST" products improve with age and the upkeep cost is nil.

LOW INSURANCE COST

A building roofed with "EVEREST" Bigsix Corrugated Sheets or "EVEREST" Trafford Sheets is passed as a first class fire risk when supported on purlins spaced not more than 5' 6" apart.

"EVEREST" Asbestos Cement Flat Sheets.
"EVEREST" Bigsix Asbestos Cement Corrugated Sheets.
"EVEREST" Trafford Sheets.
"EVEREST" Asbestos Wood Sheets.
"TURNALL" Asbestos Wall Boards.
"EVERITE" Asbestos Cement Pressure Pipes.
"EVERITE" Asbestos Cement Rainwater pipes and fittings.
"EVERITE" Asbestos Cement Soil pipes and fittings.
"TURNALL" Stipple Glaze Decorated Sheets.
"TURNALL" Glazed Panels.
"EVEREST" Plastic Asbestos Roofing Compound.

"EVEREST" Sheets spell Permanence

MODEL 55

Rs. 92

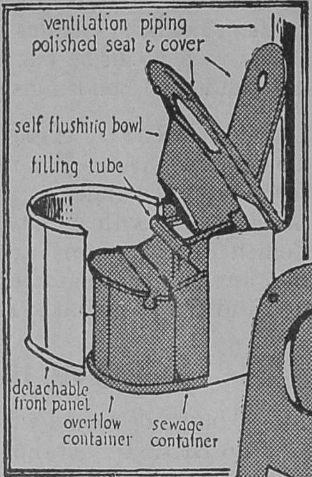
f. o. r. Ports

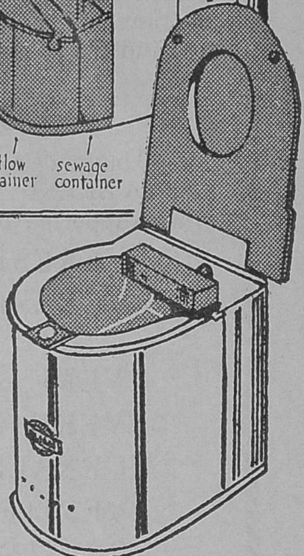
Constructed to the highest standards, both as to sanitary efficiency and excellence of finish, from the finest quality English steel throughout, and processed after manufacture to withstand rust and corrosion.

Consists of beautifully stove-enamelled steel Ventilation Chamber built on solid steel raised stand ; 7 feet of 3-in. enamelled steel piping, three elbows and cowl ; finished in Eau-de-nil and Gold. Highly polished Seat and Lid with Chromium-plated hinges.

Cheaper qualities—
Rs. 43 & Rs. 69

Upkeep costs less than Re. I per month—six months' chemical free with each closet.

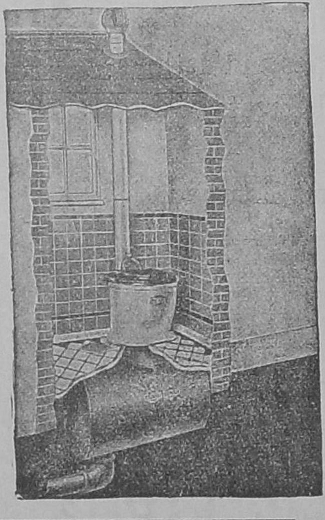




MODEL 66—Rs. 129 f. o. r. Ports

This model gives the effect of a water closet ; the self-flushing bowl screens the contents of the container from view, and prevents any possibility of splash, whilst the flushing action ensures complete submersion of the sewage and paper in the chemical. On the bowl being tipped after use, the sewage is emptied into the container for treatment ; when the bowl is replaced, it is replenished with solution drawn up from the screened container below. It is a model which would be in place in the most modern bathroom.

The Ventilation chamber is enamelled Eau-de-nil, and has a detachable front panel to facilitate removal of the inner containers ; these are guaranteed for ten years and are vitreous enamelled, as is the self-flushing bowl. Includes seven feet of 3 in. enamelled Ventilation piping, three bends and cowl.



SELF-DRAINAGE TANK MODELS

This is a self-contained system ; the need for emptying sewage containers by hand being entirely eliminated.

Model UG/30, illustrated, has a porcelain bowl, and is similar in appearance to a modern water-flush closet. An underground tank contains the chemical solution, and the only part of the appliance which comes into direct contact with sewage is a vitreous-enamelled plate which comes into position beneath the bowl when the seat lid is raised for use ; this plate is automatically cleaned and sterilised after each use.

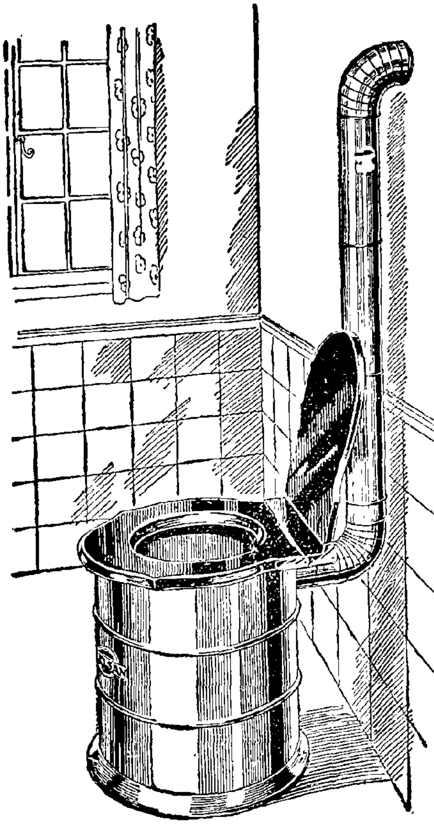
The contents are not only sterilised but completely liquefied and emptying is effected by undoing a tap and allowing the contents of the tank to drain into a soakaway or other receptacle, Recharging is necessary only two or three times a year.

MODEL U. G. 30
Rs 307 f. o. r. Ports

ELSAN

MODEL O. G.
(for upper Floors)
Rs. 233 f. o. r. Ports

Modern SANITATION FOR ESTATES



The Elsan Chemical Closet brings to those living in unsewered districts all the advantages of modern city sanitation. It is a simple and self-contained system, being quite independent of drains and running water and is guaranteed completely odourless and hygienic.

The special chemical used with the closet instantaneously renders the sewage germ-free and inoffensive, and charging, which is simplicity itself and is necessary only every three weeks or so, costs merely a few annas.

The *discomfort* of having a primitive "commode" in one's bathroom is only one disadvantage of this obsolete system. Contamination of soil, and frequently of water and food, is caused by the sweeper's haphazard methods of sewage disposal, and this is often responsible for Dysentery, Cholera, Typhoid, and many other diseases. Why tolerate an unpleasant and insanitary make-shift when an Elsan Chemical Closet, safe, odourless, and germ-free, costs so little?

ELSAN
needs
NO DRAINS
NO SEPTIC-TANK
NO WATER-SUPPLY

Over 100,000 in use. Installed by over 500 Municipal Authorities in Great Britain alone. 70 on H. M. Estates at Sandringham and Windsor. Awarded Silver Medals by Royal Sanitary Institute.

HISTORICAL NOTES

ON THE

EARLY DAYS OF THE PLANTING INDUSTRY OF SOUTHERN INDIA.

THE history of introduction of planting into the Districts of Southern India still remains unwritten and I simply give below those notes published in the first edition of the Directory with a few additions which have come to my notice during the year.

The commencement of the European planting industry in South India was with coffee. The date when coffee was first introduced into India, probably from Abyssinia or Arabia is unknown, but popular legend says it was brought from Mecca by a Moslem pilgrim named Baba-ud-din in 1600 to Chikmagalur, and that the hills, on which he planted the seven seeds he brought, were named after him. Ukers in his recently published book on coffee, states,—'A better authority gives the date as 1695.' He fails however to quote his authority, and as it is an authenticated fact that coffee seedlings were taken from Cannanore in 1696 to Kedawoeng in Java and planted in the garden of the Governor-General, William Outchoorn, the date 1695 would seem to be too late to fix for the introduction of the plant into India. The first plants introduced into Java were almost immediately afterwards destroyed by floods, and a second consignment of coffee plants was made from 'Malabar' to Java by Henricus Zwaardenkroon in 1699 and became the progenitors of all *Arabica* coffee in the Dutch East Indies.

The next mention of coffee, which I have come across, is in the 'Letters from Malabar' written by the Rev. Jacob Visscher, Chaplain at Cochin from December 1717 to December 1723. He writes:—

'The coffee shrub is planted in gardens for pleasure and yields plenty of fruit, which attains a proper degree of ripeness. But it has not the refined taste of the Mocha coffee . . . . an entire new plantation has been laid out in Ceylon.

In 1760 Jaoa Alberto Castello Bramo took to Rio Janeiro coffee plants from Goa and thus started the great coffee industry of Brazil.

Although coffee is mentioned among the imports into Cochin by Adrian Moens in his Administration Report of 1781, the total export from Cannanore in 1799 was according to Buchanan in the Diary of his Journey from Madras through Mysore, Canara and Malabar, 'one box' and in 1800 '6 chests and 6 maunds.'

The earliest reference to the planting of an estate, which I have found is contained in a letter written by the Abbe Dubois to Colonel Miller, Resident of Mysore, under date 15th September, 1805, which reads as follows:—

'About ten years ago, when I was in Baramahal, Colonel Read, Collector in that part of the country, undertook to make a large plantation at Trippatur by means of an American he sent for from the coast and to whom he gave a monthly pay of 25 pagodas. The plantation I saw many times had thriven well during the first year and promised success, but the manager proving a man without conduct, Colonel Read was soon disgusted of his services and dismissed him. At the same time having found no one to replace him and perceiving besides that the produce of the kind of cultivation would in no case equal the expenses necessary, in that part of the country, the plantation was suffered to perish.'

It was very shortly after this that the East India Company opened an experimental plantation at Anjarakandi, near Tellicherry under Mr. Murdock Brown to whom they handed it over in 1799. The coffee there is mentioned by Buchanan in 1800 as doing well but as not yet being in bearing.

Coffee was at this time cultivated on the Bababudin Hills and to be obtained in the Mysore and Bangalore bazaars at the time Seringapatam was taken in 1799. It later became a monopoly of the Mysore Durbar who took over from the ryot half his crop In 1823 the Mysore Durbar rented to Messrs. Parry & Company its half share for Rs. 4,270 per annum for ten years.

Dr. Wallich and Mr. Gordon had begun coffee planting in Bengal in 1823 and Lord Amherst's Government was anxious to encourage the enterprise. On the 7th May, 1824, Government issued a Resolution as follows:—

'As far as judgment can in such cases be formed, until trial be made, there appears to be abundant reason to conclude that the cultivation of coffee may be successfully prosecuted in this country on an extensive scale and that the article may indeed be produced at a cost considerably below that which the lowest price hitherto known in the market, would amply reimburse, while at the same time there is scarcely anything of which the consumption is likely to experience so large an augmentation in the event of any material reduction in price.'

It proceeds to point out the necessity of those undertaking the enterprise having an assured tenure for a considerable period and although natives might be expected later to take up the work, in its early stages it was necessary to allow scope to European enterprise and intelligence.

In 1825 Capt. Bevan of the 27th Regiment, E.I.C., Madras Native Infantry, took over charge of the garrison at Manantoddy in North Wynaad and very shortly afterwards gave his attention to the introduction of the cultivation of coffee into the district. A few plants given him by 'Anjarakandi Brown' throve so well and proved so productive that he recommended the more general introduction of the plant into Wynaad, and Mr. W. Sheffield, Collector of Malabar, sent quantities of seed to be distributed among the native inhabitants. However, owing to the want of knowledge as to the cultivation necessary and neglect, that experiment proved a failure. Capt. Bevan writes however:—

'I extended my plantation considerably while I remained in the station on ascertaining from impartial and good judges (especially Bishop Turner, who had tasted the coffee) that it possessed the flavour and aroma of the finest Mocha berries.'

What the extent of his plantation was, it is impossible to trace, but he would certainly seem to have been the pioneer of the industry on the Western Ghats. He left Manantoddy in 1831. Some time between 1830 and 1840 two members of the firm of Parry & Company, passing Manantoddy on their way to the Bababudins were so struck with the coffee they found there, that at their suggestion the 'Pew' Estate was opened on the hill where the forest offices now stand, and before 1840 Messrs. Glasson, Richmond, Morris and others had opened estates nearby.

About 1830 Mr. Cockburn is stated to have commenced an estate on the Shevaroys. Major Bevan mentions that in 1839 he met Mr. Fischer at Salem, who had acquired several thousand acres for the purpose of opening on those hills.

It is often stated that 'Tom' Cannon first opened an estate near Chikmâgalur in 1830, but I think investigation will show that it was some seven or eight years

later and that the first European to actually plant coffee in Mysore was either Mr. Jolly of Messrs. Parry & Company or Mr. H. Stokes of the Mysore Commission. The latter in his Report, dated 19th May, 1838, says,—'I made a small plantation at Shimoga in August 1835 and it commenced to bear last September.' Incidentally in the same Report appears the first reference which I have found to borer, it states,—'In very dry seasons many of the trees die and snap off suddenly close to the ground.'

In 1843 Fred Green started planting in the Munzerabad District and two or three years later Fred Meppen commenced the Yemmäy Doddi Estate near Kadur.

In 1840 Dr. Magrath, the Residency Surgeon at Mysore, sent coffee plants from there to Messrs. Lascelles and Pope on the Nilgiris, who opened the Hardathorai Estate at Kotagiri, and about the same time Mr. M. D. Cockburn of the Madras Civil Service opened the Balahardar Estate on the Kotagiri Ghat and in the year following Bonnahutti, commonly known as Hulical was commenced.

In 1854 Mr. Fowler opened the first estate in Coorg a few miles from Mercara. In 1855 Mr. H. Mann and Donald Stewart opened on the Sampagi Ghat. Mr. G. M. Martin, the acting Superintendent of Coorg in course of his Report, dated 18th June, 1856, mentions that there were only two European planters then in the District, 'whose plantations have not yet come into full bearing.'

The fist estate opened in the Nelliampathies was 'Chandramalla' in the early sixties. 'Sheirmelly' which still exists as a Rubber Estate was opened in 1866.

Mr. A W. Turner commenced opening in the Kanan Devans in 1879–80, but this is bringing us down to recent times.

To turn to tea. In 1832 Dr. Christie, a surgeon on the Madras establishment, was placed on special duty to conduct meteorological and geological inquiries in Southern India, in a very short time he applied for a grant of land in the Nilgiris as he desired to experiment with the culture of tea, coffee and mulberry and at the same time for the exclusive privilege of making ice for sale in the Presidency. He died in November of that year and of his tea plants three were given to the Commandant of Ootacamund, Colonel Crewe, who put them down in the garden of Crewe Hall, others were distributed to various parts of the hills for trial.

The authorities at Kew had as long ago as 1788 urged that the planting of tea should be undertaken in India and in 1834, unaware that the plant was indigenous in Assam, Lord William Bentinck sent a commission to China to obtain seed and expert tea makers, the result was the distribution of plants to many parts of Southern India for experiment. Those on the Nilgiris were planted chiefly at the experimental farm at Kaity, cared for by Colonel Crewe and M. Perrottet, a French botanist and were reported in 1839 to be growing luxuriantly, but it was another fifteen years before attempts were made to grow tea on the Nilgiris on a commercial scale.

That they did well elsewhere is shown from the following quotation from Major Bevan, who wrote in 1839:—

'Since I left Wynaad, the cultivation of the tea plant has been introduced and with very reasonable prospect of success. However the discovery of the tea growing wild in Assam renders its culture in Wynaad less important than it would otherwise have been.

And the Report of General Cullen,. Resident of Travancore, who, writing in October 1859, states:—

'The tree thrives well in Travancore territory, both at the level of the sea and altitudes of 1,800 and 3,200 feet. I first met with it in the coffee plantation of Mr. Huxam in the year 1841, on the route from Quilon to Courtalam, at a factory called Caldoorty, about forty miles inland and six or seven hundred feet above the sea. There are some ten or fifteen trees from 20 to 25 feet high; they were, I believe, introduced during the Government of Mr. Lushington, who, I believe, also introduced those formerly at Kaity in the Nilgiris. I procured plants from Mr. Huxam and put them down in an experiment spice garden which I established some twelve years ago at 1,800 feet on a hill in the south of Travancore near Oodagherry. They are now trees of 20 to 30 feet high, growing vigorously; and I have four hundred plants procured from their seed growing on another hill near the Tinnevelly frontier, at an elevation of 3,200 feet. There can be no doubt therefore of the facility of its introduction, although from the moderate altitude and great atmospheric moisture of the localities hitherto selected, they may possibly be considered to grow more luxuriantly than is desirable; but which, if a defect at all, can probably be easily remedied by selecting ground more to the eastward, at greater altitudes, and with less humid climate.'

The first company to be formed was the 'Assam Company,' founded in 1839, but it was not till 1852 that it was proved that tea from India could compete in the London market with that produced in China. From that date development in North India was rapid and in 1868 exports reached 8,000,000 lbs.

In the South however very little progress was made, although tea planting on a commercial scale was commenced on the Nilgiris in 1853 and taken up in earnest in Ceylon in 1875. Thirty years ago the area under tea did not probably exceed 3,000 acres on the Nilgiris, one estate of some 250 acres in the Wynaad, 315 acres on the Kanan Devans, perhaps, 5,000 acres in the rest of Travancore. Of the 116,000 acres in Southern India at least 105,000 have been planted since 1893.

Until the end of the nineteenth century rubber cultivation in India had been little more than experimental. In the North trials had been made with *Ficus elastica*. In the South with *Manihot glaziovii* (Ceara) but neither were commercially important. A few trees of the para variety (*Hevea Brasiliensis*) had been grown at Plantation House, Calicut, and on the Punnur Estate at the foot of the Tambracherry Ghat. It was not till 1902 that the Periyar Estate at Thattakad in Travancore was opened and within the next fifteen years practically all the present area was planted.

H. W.

15th November, 1927.

Section I

PARTICULARS OF ESTATES

The following pages give the particulars of Estates in South India, which have a planted area of 10 acres or more of Tea, Coffee, Rubber, Cardamoms, Pepper or Cinchona. These are arranged in alphabetical order of the names of their Proprietors, and are grouped under the following District headings.

Coimbatore	Mysore
Cochin	Nilgiris
Coorg	Nilgiri–Wynaad
Madura	Salem–Shevaroys
Malabar	Tinnevelly
Malabar–Wynaad	Travancore

To show what District Planters' Association, if any, each proprietor is a member of, the following code letters are prefixed to their names.

APA	..	Anamallai Planters' Association (Incorporated)
CTP	..	Central Travancore Planters' Association (Incorporated)
CPA	..	Coorg Planters' Association (Incorporated).
ITP	..	Indian Tea Planters' Association, Travancore
KDP	..	Kanan Devan Planters' Association (Incorporated)
MUN	..	Mundakayam Planters' Association (Incorporated)
MPA	..	Mysore Planters' Association (Incorporated)
NEL	..	Nelliampathy Planters' Association (Incorporated)
NPA	..	Nilgiri Planters' Association (Incorporated)
NMI	..	North Mysore Indian Planters' Association
SPA	..	Shevaroy Planters' Association (Incorporated)
STP	..	South Travancore Planters' Association (Incorporated)
TCP	..	Travancore Cardamom Planters' Association
WCP	..	West Coast Planters' Association (Incorporated)
WPA	..	Wynaad Planters' Association (Incorporated)

The names of the Agents of Registered Planting Companies are given in *Italics* under the name of the Company.

The Vernacular names of estates, if different from their usual names, are printed in *italics* under those names.

In the Travancore District, where the name of the 'Anchal' Office is different to the ordinary Post Office, it is printed in *italics* under the name of the Indian Postal Service address.

In the acreage statement of Minor Products, these are distinguished by the following letters before the number of acres:—C. for Cardamoms; P. for Pepper; and Cin. for Cinchona.

Section IV.

PLANTING ASSOCIATIONS, AGRICULTURAL BOARDS, DEPARTMENT Etc.

(A) THE UNITED PLANTERS' ASSOCIATION OF SOUTHERN INDIA (Incorporated)

Founded 1893.

Registered Offices: Parry's Buildings, North Beach Road, Madras.
Messrs. Harrisons & Crosfield Ltd., Quilon, Travancore.
U. P. A. S. I. Labour Department Office, Mysore.

Head-Quarters: 'Glenview', Coonoor, Nilgiris.

Telegraphic Address: At all Offices and Branches: 'UPASI'.

The Association was founded as the result of a Conference between the different Planters' Associations held at Bangalore in 1893. The first General Meeting was held at the same place in 1894. The chief object for which it was established was to promote and protect, in all parts of the world, the interests of the various planting industries in Southern India.

Membership consists of Planters' Associations (of which there are now thirteen in South India) and companies, firms and persons connected with and interested in planting.

The affairs of the Association are managed by a General Committee consisting of two representatives of each District Planters' Association, and an Executive Committee made up of the Chairman, the Planting Member (if he is not a salaried officer of the Association) or the ex-Chairman, and three representatives of District Associations, one each to represent the interests of tea, coffee and rubber respectively. Three other members-in-waiting are elected at the same time to replace any casual vacancy that may occur.

The Association is represented in London by the South Indian Association in London, and is affiliated to the Chambers of Commerce of Madras and Mysore, and is a member of the Employers' Federation of India, Bombay. It co-operates with the Indian Tea Association, Calcutta, the Travancore Combined Planters' Association of Quilon, and is a member of the Indian Tea Cess Committee, Calcutta.

Political Department: Planters affiliated to the Association elect a Member of the Legislative Council, Madras. The seat is now occupied by Mr. W. K. M. Langley, M.L.C. The permanent Planting Member, Mr. F. E. James, now represents the Madras Europeans in the Legislative Assembly, Delhi.

Labour Department: The Labour Department of the United Planters' Association of Southern India was established by the United Planters' Association of Southern India as a separate department voluntarily subscribed to by the South Indian planters. The objects in starting the department were to regulate recruiting, settle inter estate disputes, put a stop to crimping, and to carry on propaganda work for new labour. The first Director, Mr. Aylmer Ff. Martin, organised the department and continued as its Director for five years. In 1919 he retired from the directorship, and the management of the department was undertaken by the Secretary, United Planters' Association of Southern India, as Secretary and Director. In 1922 the Association decided that the Labour Department should have again its

own whole-time Director, and appointed Lieut-Col. C. H. Brock, O.B.E., V.D., to this post.

The following is a complete list of all the European Superintendents and Indian Agents working for the Department and their addresses:—

EUROPEAN STAFF

Director: Lt.-Col. C. H. Brock, O.B.E., V.D., 'Glenview', Coonoor, Nilgiris.

Superintendent: Coimbatore-Salem Division: A. H. Mackie.
Mysore-Mangalore Division: F. W. Winterbotham.

SCIENTIFIC DEPARTMENTS.

The Association has a Scientific Department of its own, one for each product, *i.e.*, for Tea, Coffee and Rubber, at Nellakotta (Nilgiris), Sidapur (Coorg) and Mundakayam (Travancore) respectively. The Tea Experimental Station at Nellakotta has a fully equipped laboratory where two European and three Indian Scientific Officers work. The U. P. A. S. I. co-operates with the Mysore Government at its Coffee Experimental Station at Balehonnur and supports one European and Indian scientist while maintaining a sub-station at Sidapur. The Rubber Experimental Station at Mundakayam is being continued only on a care and maintenance basis.

TEA EXPERIMENTAL STATION.—Situated near Nellakotta in the Nilgiri-Wynaad District. Post and Telegraph Office.—Devarshola, Nilgiris.

Chief Scientific Officer.—Dr. W. S. Shaw, D.Sc., Ph.D., M.Sc., F.I.C.

Asst. Scientific Officer.—Dr. K. B. W. Jones, Ph.D., A.R.C.Sc., B.Sc., A.I.C.

Entomologist.—S. Ananda Rao, M.Sc.

Mycologist.—M. K. Subba Rao, B.Sc.

Soil Chemist.—V. Jayaraman, B.A., B.Sc.

COFFEE SCIENTIFIC DEPARTMENT.—W. W. Mayne, B.Sc., is on the staff of the U.P.A.S.I. but carries out his work at the Mysore Government Coffee Experimental Station at Balehonnur, Kadur District, Mysore, under the Director of Agriculture, Mysore State.

Address: Balehonnur, P.T., Kadur District.

The Coffee Sub-Station at Sidapur is under the charge of V. K. Subramanyam, B.Sc.

Address: Sidapur PT, Coorg.

RUBBER MYCOLOGIST STATION.—Situated near Mundakayam, Peermade, Taluk Travancore. Post and Telegraph Office.—Mundakayam, Travancore.

Supervisor in charge of the Station.—H. B. Macpherson, Mundakayam.

PLANTERS' CHRONICLE.

The Association issues a fortnightly paper called the "Planters' Chronicle" distributed free to all planters, members of District Associations affiliated to the Association, and to many scientific bodies throughout the world. Started in 1906, it is now managed by Lt.-Col. C. H. Brock, O.B.E., V.D., and published at Madras.

Other activities of the Association include a Buying Agency Department and a Benevolent Fund. THE BUYING AGENCY obtains by co-operation special terms in return for prompt payment. THE BENEVOLENT FUND assists and relieves distress among members of the Planting Community, preference being given to members of the Fund.

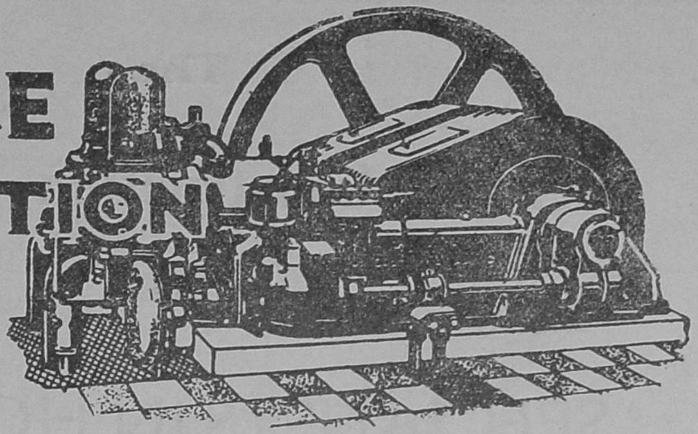
REDUCE PRODUCTION COSTS



THE intricate moving parts of a Modern Oil Engine require efficient lubrication. Unless every part of the engine is thoroughly and efficiently lubricated wastage of power and subsequent breakdowns will result.

There is one sure way by which engine running cost may be reduced to a minimum and a high standard of efficiency maintained and that is by always lubricating with Wakefield Industrial Lubricants.

C. C. WAKEFIELD & Co., Ltd., are always willing to give expert advice on correct lubrication for any type of engine.

C. C. WAKEFIELD & CO., LTD.,

Head Office for India:—**3, Wittet Road, Ballard Estate, Bombay.**
